Midterm/Final Presentation

Project Name

Students: [Name1], [Name2]

Supervisor: [SV Name]

Context: Project [A/B/Special]

Semester: Winter/Spring, Year

Date: [dd/mm/yy]

In Collaboration with: [Company name] [Company Logo]
Presentation Outline

In this slide you put the general outline of the coming presentation
Project Goal

• Describe the general goal of the project: what is the problem you face and what you want to achieve
Background

• A general description of background, e.g. the environment, existing system, solutions etc.
Optional Solutions

• Describe in more details existing relevant solution(s) for the problem – general description, algorithms, systems, pro’s Vs. Con’s (quality, cost, complexity...) etc.
Chosen solution: Block Diagram

- A detailed explanation about the chosen solution – a block diagram is a very good way to start with, probably followed with a few more slides describing the solution and maybe more diagrams for details if needed
Chosen solution: details

- Explanations of the solution and the block diagram from the previous slide –
Results

• Present your results – the output of your system with comparison to other systems so you can show what you do better than others
Summary

• A short summary of the work – main points in the implementation, achievements, original contribution etc.
Conclusions

• Explain in short what can be learned from your results, future work you think can be done etc.
References

• Only most important references should be mentioned here, in the following form:
